Patient: Vranjesevic, Teodora; 01/09/2007
Diagnosis: Acute myeloid leukemia

Dear Mr and Ms Vranjesevic,

Thank you for contacting us, concerning your daughter who is suffering from acute myeloid leukemia and who has an indication for stem cell transplantation.

We can offer this treatment at our clinic. However, I sincerely regret to say that such treatment is very expensive and the costs amount to approximately 350.000 Euro. If substantial complications would occur, this amount can be even higher. The costs are calculated according to the German "Krankenhausentgeltgesetz". The amount overpaid will be refunded.

According to the University Hospital's decision this total amount has to be transferred in advance to the bank account given below.

The treatment usually lasts approximately 9-12 months (chemotherapy, stem cell transplantation, aftercare) and includes multiple in-patient, partially in-patient and out-patient treatment stays at the hospital which cannot be exactly planned in advance. The above mentioned amount does not include the costs for accommodation and board for the period of non in-patient stay of the patient. Kindly note that during inpatient stay of your child on the transplantation ward you cannot stay overnight in the Hospital and need an accommodation for this time as well. Accommodation is not organized by our clinic. If requested we can send you contact datas for apartments that could be booked in the past.

The costs for translation or interpreting services, transfer and public transportation are neither included and must be carried by the patient resp. his relatives as well.

Please contact the International Office of the University Hospital Frankfurt for administrative and financial issues. (Daniel Wettengel, Email: daniel.wettengel@kgu.de, Tel.: +49 69 6301 5720, Fax: +49 69 6301 7550).

The chance of a successful transplantation will be about 65 %. There is a 10% risk of treatment-related mortality and a 15% chance of graft rejection.

If you have any further questions, do not hesitate to contact us.

With best regards

Prof. Dr. med. Peter Bader

Important note:

Please kindly inform us **before** you transfer the whole treatment costs because we cannot guarantee at any time admittance on our transplantation ward.
